TECH ZONE

CONTROL BOW

Bow Peak: 24 mm
Bow Position: 235 mm

Featuring a sweeping profile, it is designed to offer all round assistance to a 360-degree skill set. Perfect for those players looking for an all-rounder.

LATE BOW

Bow Peak: 24.5 mm
Bow Position: 220 mm

A sweeping profile with a late placement of the bow offers high-level assistance to dribbling, aerial passing skills, and drag flicking. Revised for the new season, our updated Late Bow profile now features a thinner head shape and a slimmer shaft profile.

LATE BOW PLUS

Bow Peak: 24.5 mm
Bow Position: 220 mm
Groove Depth: 3 mm

Our Control Wing Technology is positioned in the lower third of the shaft to aid pick-up and generate slingshot momentum, ideal for players focused on drag flicking. A thinner shaft profile and refined head shape further enhance fast, dynamic skills.

XTREME LATE BOW

Bow Peak: 25 mm
Bow Position: 200 mm

Our most aggressive and extreme placement of the bow offers the perfect shape for the modern player who executes perfect 3D skills and outstanding flicks. A thinner shaft profile and head shape offers the maximum assistance in aggressive playability.
